Abstract:

The following paper aims to analyse and re-evaluate the naophorous statue, inventory number TR 27.11.58.8, at the Egyptian Museum in Cairo, preserved in storeroom D57 that came from Sais. The owner of the statue is a man called *W3h-ib-R^c-mn*. The headless statue represents a kneeling man bearing a Naos with two hands containing a figure of the god Osiris. This paper describes the statue's story, compares its artistic elements to those of other similar works, translates the hieroglyphic inscriptions, and provides philological comments on them.

Keywords: Naophorous Statue, *W3h-ib-R^c-mn*, Saite Period, Naos, Osiris, The Egyptian Museum in Cairo.

المُلخَص:

تهدف هذه الورقة البحثية إلى تحليل وإعادة تقييم تمثال ناووسى يحمل رقم مؤقت 8/58/11/27، ومحفوظ بالمتحف المصري بالقاهرة بمخزن D57 والذي عُثر عليه في سايس، صاحب التمثال رجل يُدعى "واح إيب رع مين". التمثال بلا رأس ويُمثل رجلاً راکعاً مقدماً لناووس يحتوي على شكل للمعبود "أوزير" بين يديه. ويصف هذا البحث قصة التمثال، ويقارن عناصره الفنية بأخرى مثيلة، كما أنه يتناول ترجمة النصوص المنقوشة وتعليقات لغوية عليها.

الكلمات مُفتاحية: تمثال ناووسى، واح إيب رع مين، العصر الصاوي، ناووس، المتحف المصري بالقاهرة.

1. Introduction:

Depending on the pose of the statue; this is a naophorous sculpture, which is a very common Egyptian statue style first used in the New Kingdom¹, dating back to the first half of the 18th dynasty in the reign of Queen Hatshepsut²; as the oldest model of the

known naophorous statues so far is the one of her viziers and prime architect Senenmut³, then the naophorous statues became very typical in the late period and continued until the Greco-Roman era⁴. The individual holds, embraces, and presents a small figure of a deity enthroned within a Naos with a base between his hands.

The god inside the Naos or shrine of the naophorous statues was not always Osiris or Neith; this matter is only related to the naophorous statues that come from the Temple of Neith at Sais, as they are heads of its traid. During the New Kingdom, the presence of the god Osiris was rare, based on the dating of the known models held by the Egyptian and international museums so far⁵. Still, there were many gods and deities, such as Atum, Bastet, Ptah, and others were represented in the Naos of the naophorous. In addition to representing the gods' groups and triads inside the Naos of this statue's category.

The owners of these statues - most likely - take four positions: standing, sitting, kneeling, and squatting. The Sais' naophorous statues - whether their positions are - usually contain a figure of Osiris or Neith. As an example of the standing position, the lower part of the standing naophorous holds a shrine containing the god Osiris at the British Museum under inventory no. EA2288 (Figure No.2)⁶, as an example of the kneeling position, Naophorous of Horwedja at the Cleveland Museum of Art with the inventory no. 1920.1978, (Figure no. 3)⁷, and the squatting, such as the naophorous block statue of a Governor of Sais Psamtikseneb at the Metropolitan Museum under the number 1982.318 (Figure no.4)⁸.

As well as, for the Sais' standing naophorous holding a Naos containing a figure of the goddess Neith; the naophorous statue of Amenhotep with the number EA41517 at the British Museum (Figure no.5)⁹, and for the kneeling ones; the naophorous of Pawerem, at Brooklyn Museum under the inventory no. 37,36E; 70.88 (Figure no.6)¹⁰,

Remarks on the Naophorous Statue of "*W3ḥ-ib-Rꜥ-mn*" at the Egyptian Museum, Cairo (TR 27.11.58.8).

and the naophorous statue of Gem-nef-hor-bak that is held at Kunsthistorisches Museum Wien and has the number INV 62 (Figure no.7)¹¹

This naophorous statue TR 27.11.58.8 (Figure no.1- a, b, c, d) was already published in 1967 by the Italian Egyptologist Adda Bresciani in an article consisting of eight pages in the Italian Language. Unfortunately, this article is limited to describing the statue with a short description, reading, transliterating, and translating the hieroglyphic texts inscribed on it without any analysis or images of it. In addition, the publisher mentioned that she had permission to study the statue from the General Director of the Egyptian Museum in Cairo in 1963, then she got the facsimile of the hieroglyphic inscriptions from George Posener¹², which means that she probably did not check and study the statue in person.

In 1975, Ramadan El-Sayed also studied the names and titles of the naophorous owner and mentioned them in his book with a complete explanation¹³. Then, in 2015, David Klotz mentioned the number of the naophorous to emphasise the mutual protection between the owner of the naophorous and the god, as well as the idea that the owners of these statues wrote their biographies, which include life events that confirm historical facts, so these statues are considered essential sources and documents¹⁴. Finally, in 2023, Aleksandra Hallmann included the naophorous with a clear photo of it in her book, as she studied the Persian dress of its owner¹⁵.

2. The Untold Story behind the Naophorous:

It has no more documents at the Egyptian Museum than the initial information in the Temporary Register Book. In addition, it was revised well, searching for further data, but it has no more. However, Bresciani mentioned in her article that this statue was known before. It was sold on Tuesday, April 30th, 1935, at an auction gallery held by Sotheby and some partners in London¹⁶. The photo of the naophorous and its

¹⁶ A large auction gallery for selling antiquities and antiques began its activity in 1744 and continues until the moment. It has agents in different countries such as the USA and France. Sothebys' website, citing: <https://www.sothebys.com/en/>, accessed on 11.11.2022, at 12.30 pm, their address in England: 34-35 New Bond Street London W1A 2AA, UK

description were included for the first time in its catalogue with another naophorous¹⁷ (Figure no.8- a, b). In the same year, 1935, Hermann Ranke mentioned the nickname of the statue's owner in the second part of his book "Personennamen", page 273. Later on, the naophorous got somehow into the private monuments collection of King Fouad I. Probably, he was the person who bought it from the auction of Sotheby, he already passed away a year after, and after the 1952 Egyptian Revolution; it was acquired by the Egyptian Museum in 1958 within the collection of King Fouad I and the Royal Family¹⁸, but it was not registered in the "Previous King Register Book" and was directly added into the collection management of the museum in the Temporary Register Book.

3. Conception:

Opinions differed about the symbolism of naophorous statues; does the person carrying the Naos preserve the deity's powers? Or does embracing it mean that he derives protection, fortification, and security from him? Or does it mean the divine and sacred accompaniment that follows him forever in general?¹⁹ It could be that protection is mutually between the priest presenting the Naos of the god and the god himself; as priests always guard the statues of gods and make every effort to serve them, even with self-sacrifice, perform different rituals, and ward off any depravity and evil that may afflict their symbols. At the same time, the priest lives with god forever, expecting to enjoy safety, protection, and holiness²⁰.

This naophorous was one of the statues of the goddess Neith temple in Sais (Figure no.11), as it is somewhat similar to the naophorous of Pismatic-si-neith at the University of Pennsylvania Museum of Archaeology and Anthropology no. 42-9-1, other than some details²¹ (Figure no.9), and also to the naophorous of Pa-Debehu at the Vatican Museum under the inventory no.60.11 with some artistic differences (Figure no.10)²², both dating back to the dynasty 26, and came from Sais as well.

4. Material: Black Basalt.

5. Dimensions:

- Maximum total height of statue: 55 cm.
- Measurements of rectangular base: 31.5 cm in length, 21 cm in width.

Remarks on the Naophorous Statue of "*W3h-ib-Rꜥ-mn*" at the Egyptian Museum, Cairo (TR 27.11.58.8).

- Measurements of the outer frame of Naos: upper edge: 11 cm, lower edge: 12.5 cm, and both sides: 20.5 cm.
- Measurements of the inner frame of Naos: upper edge: 6 cm, lower edge: 7 cm, and both sides: 15.5 cm.
- Height of Osiris figure: 11.8 cm.

6. Current Location: D57 – Storage - Third Floor – The Egyptian Museum in Cairo.

7. Dating:

- Based on the text on the top of the Naos, the owner is a priest who served during the reign of King Amasis, whose erased name is barely recognisable on the top of the Naos. It dates to ca.569- 525 B.C. In addition, it records a typical style of the Dynasty 26 art (Saite period ca.664- 610 B.C.).
- The excavation date and method are unknown.

8. Provenance:

- Based on the inscribed texts, this statue was dedicated to the temple of the goddess Neith in Sais, Sa El-Hagar, El-Gharbiyah Governorate, Western Delta, Lower Egypt.

9. Condition:

- The head, neck, and top of the back pillar are missing.
- Often, these statues are discovered and found broken. Maybe the upper parts were used as building elements in architectural structures, as is usually the case²³.
- Maybe the head of the statue was sold as a separate piece for one of the galleries or private collections worldwide.
- The body of the statue is in perfect condition.

10. Physical Description:

The owner, in his normal kneeling position, stands upon a rectangular plinth surrounded by a horizontal line of hieroglyphic text (Figure no. 1a). He wears a long garment of heavy fabric from two pieces; a mantle with a V-neck shape with two-thirds sleeves, and a long kilt that extends from the chest to under the calf before the ankles with a large knot tied at the center of his chest²⁴, with a strip of additional material angled towards the right side of the body, it is a high-waisted kilt with a Cone-Shaped Roll and an overhang deriving from the Roll²⁵. He embraces a Naos resting upon his hips. His palms rest against the sides of the Naos as if to steady it. Fingers and toes are carved with great precision.

²³ Burkard, G., "Torso eines knieenden Naophoren, Liebieghaus, Museum Alter Plastik, Ägyptische Bildwerke. B.III: Skulptur, Malerei, Papyri und Särge, Melsungen, 1993, 204.

²⁴ Hallmann, A., "Clothing (non-royal) Pharaonic Egypt, the Encyclopedia of Ancient History, Unknown, 2017, p.2.

²⁵ Hallmann, A., "Ancient Egyptian Clothing", 207, 216.

The front of the Naos is decorated with a carved recess in relief, featuring a smaller figure of Osiris, the god of the Afterlife. Osiris wears a distinctive Atef crown, a long pointed beard, and a tight dress; he appears partially wrapped in a mummified form, holding his usual symbolic crook and flail. The four edges of the Naos façade are also inscribed with a text, and this inscription continues onto the standard supporting the Naos. The back pillar of the statue was inscribed with two vertical lines of hieroglyphic text.

The stone is smoothly polished. An extension of the stone connects the rear of the Naos and the abdomen, which means that this statue is made of a piece.

The head was probably shaven or covered with a headdress. In general, the heads of the male statues of the period after the Persian occupation took one of these two styles. Still, the one covered by a wig was the most common style, and there was no specific artistic or sculptural rule that conditioned this²⁶.

11. Artistic Features:

This statue presents a combination of traditional and innovative artistic styles that are typically used to date the monument to the 26th Dynasty. The statue presents major events from the lifetime of *W3h-ib-R^c-Mn* artistically and textually, as ancient Egyptian art is one of the most creative ways of expressing human experience. It was used as a tool for telling stories.

12. Inscriptions:

The statue is inscribed with hieroglyphic texts in three parts, the first on the four edges of the Naos façade of the god Osiris (A), the second on the rectangular base (B), and the third on the back pillar (C).

A. Two texts on Naos; one of the outer frames of the Naos.

A1. Text on the outer frame; is divided into two parts, each part starts in the middle of the upper side, ends in the middle of the lower part, and contains the *h^tp-di-nsw* formula.

The left edge of the Naos:

²⁶ Bothmer, B. V., “The Egyptian Sculpture of the Late Period 700 BC to 100 AD”, New York, 1960, 65.

Museum), JE 34044 & JE 34045 both still at the EMC: Gauthier, M., H., “Travers la Basse-Égypte”, ASAE 21 (1923), 197: 213.

ś. *Hr-īi*³⁰ is a name of the owner’s father, which means Horus is coming.

A2. The right edge of the Naos:

*ḥtp-di-nsw (n) Wsir ḥnty ḥwt-bit [di.f] t mrḥt n im3ḥw 3w-ḥw sm3 t3wy tf-nḥt rn.f nfr
W3ḥ-ib-rꜥ-mn ir n nbt pr 3wt-ḥw Šbn-spd*

An offering which the king gives to Osiris in the temple of bee^(a), [May he give] bread and ointment to beneficent the 3w-ḥw-priest Sematawy-tefnakhat, whose beautiful name is *Men-wḥebre*, born of the mistress of the house, the 3w-ḥw-priest sheben-sopdet.

Comments:

a. *ḥwt-bit*: “the temple/house of the king of Lower Egypt”. It was a religious center in Delta connected mainly with the cult of Osiris, for this name, see: Wilson, P., “A Ptolemaic Lexikon”, A Lexicographical Study of the Texts in the Temple of Edfu, OLA 78, Leuven (1997), 629; [El-Sayed, R.](#), “Documents relatifs à Saïs et ses divinités”, 199; Habachi, L., “Saïs and its monuments”, Annales du Service des Antiquités de l’Égypte (ASAE), vol.42, 1943, 379.

A3. Second text on the top of the Naos:

The text consists of six horizontal lines running from right to left:

³⁰ Ranke, H., “Personennamen”, Band I, 245.

Remarks on the Naophorous Statue of "W3h-ib-R^c-mn" at the Egyptian Museum, Cairo (TR 27.11.58.8).

² | wd hm.f r irt k3t m hwt-Nt m^ct nt ds šps.f hr hm.f r smr nb n ir.f fh^c n wn hry h3t.f

The beneficent, the only friend, the overseer of the cavalry^(a), the overseer of the door of the foreign lands and Libyans, the overseer of the foreign lands of Asiatic, the Aw-Haw-priest Sema-tawy-taf-nakht whose beautiful name is Wahebremen. His Majesty orders him to do work in the temple of Neith in the chamber of the flint^(b) (or knife), he is noble before his majesty more than any friend, and his arm does not rest on his front?

Comments:

(a). *imy-r ssmt* “overseer of the cavalry”. The title appeared in Dynasty 18  ³³. The person who bore the title was responsible for the administration of the chariot and was accountable directly to the king³⁴. In the Late Period and the Greco-Roman period, the word was written *smsm*³⁵.

(b). at *nt ds*: this term refers to the chamber of a flint knife. The word is used as a verb meaning “to cut” or as a noun meaning “ritual flint knife”³⁶.

13. Family of the Owner of Naophorous:

 Hr.ii (Father) /  Šp-n-Spdt (Mother)

 Sm3-t3wy-tf-nht rn.f nfr W3h-ib-r^c-mn (Son of them and the Owner).

14. Results, Conclusion, and Discussion:

The owner of the naophorous statue no.TR 27.11.58.8: W3h-ib-R^c-Mn lived during the reign of King Amasis (Hnm-ib-R^c), he was one of the most Saite kings who

³⁵ Wb.IV, 277, 1-2.

³⁶ Wilson, P., “A Ptolemaic Lexikon, A Lexicographical Study of the Texts in the Temple of Edfu”, OLA 78, Leuven, 1997, 1207-1208.

constructed and added monuments for the temple Goddess Neith at Sais, according to what Herodotus saw and described in the eleventh part of his book: “The Histories”. Herodotus mentioned that King Amasis once decided to restore and preserve some rooms in the upper section of the temple, he also ordered the carving of a lot of magnificent colossi and sphinxes, and the used blocks of huge stones came from the quarries of the Elephantine district. The king also ordered the digging of a sacred lake within the boundaries of the temple walls. All works were in honor of the goddess Neith³⁷.

The top of the Naos of the naophorous statue no. TR 27.11.58.8 is covered with inscriptions that provide quite an unusual amount of information about the time and place at which the statue was erected. It is clear from this text that the man who owns the statue served under King Amasis, whose erased name is barely recognisable on the top of the Naos. Its date thus should fall between the years 569 and 525 B.C. It also indicates and confirms that the statue was once put in the great state sanctuary of Neith in the city of Sais³⁸.

The temple of the goddess Neith is located in the Saite capital, Sais s3w (Sa El-Hagar, Western Delta). The first elements of construction and the earliest shards of evidence of structure are dated back to the Old Kingdom, while the recent ones are from the Roman Era³⁹.

The naophorous owner recorded the event of founding the new structure he already oversaw in his inscribed biography⁴⁰, so *W3h-ib-rꜥ-mn* - often - was in charge of making some royal expansion or adding new extensions to the temple.
